TUGAS PRAKTIKUM 1

The screenshot displays a web browser window on the right and a code editor on the left. The browser shows the output of a PHP script at the URL `localhost/pertemuan1/TugasPertemuan-1.php`. The output text is:

```
Data dalam format Array PHP:  
Nama: Jovita  
NIM: G.231.22.0103  
Prodi: Teknik Informatika  
Hobi: Menonton Film, Bermain
```

The code editor on the left shows the PHP script `TugasPertemuan-1.php` with the following content:

```
1 <?php  
2  
3 $jsonData = '{"Nama":"Jovita","NIM":"G.231.22.0103","Prodi":"Teknik Informatika","Hobi":"Menonton Film, Bermain"}';  
4  
5 // JSON ke dalam array PHP  
6 $arrayData = json_decode($jsonData, true);  
7  
8 echo "Data dalam format Array PHP:<br>";  
9  
10 // Loop melalui array dan cetak key-value tanpa tanda panah  
11 foreach ($arrayData as $key => $value) {  
12     if (is_array($value)) {  
13         echo $key . ": " . implode(", ", $value) . "<br>";  
14     } else {  
15         echo $key . ": " . $value . "<br>";  
16     }  
17 }  
18 ?>
